

## What is Assistive Technology?

Assistive Technology (AT) is a term for creative tools and strategies that help people accomplish tasks at home, school, work, play, and in the community.

### AT Exchange

View our used durable medical equipment marketplace online at [www.vt.at4all.com](http://www.vt.at4all.com) where users post items they want to sell or need to buy. The website is free to use!

### Services for Individuals

### Information & Assistance

Get information regarding Assistive Technology devices, services, funding, and other AT related topics by phone, email, or on our website.

### Device Demonstrations

Make an appointment with the tryout center that serves your county for a professional demonstration of specific AT devices or software. A virtual or hands-on demo can help you, a consumer and/or their representatives, make an informed decision about what tools may work.

### Device Loans

Try assistive technology for free at home, school, work, or in the community! Equipment can be borrowed for up to 30 days from any AT Tryout Center. It can be shipped directly to you for free as well. We do not provide financial loans.

## Tryout Centers

Our tryout centers are jointly managed with the University of Vermont's Center on Disability and Community Inclusion (CDCI). We offer services statewide.

Burlington AT Tryout Center: Serves Franklin, Grand Isle, Chittenden, and Addison counties

Waterbury AT Tryout Center: Serves Washington, Lamoille, Caledonia, Essex, Orleans, and Orange counties.

Castleton AT Tryout Center: Serves Bennington, Windsor, Rutland, and Windham counties.

## Services for Organizations

### Public Awareness

Our AT Tryout Center provides free informational displays and equipment demonstrations for outreach events such as open houses, support group meetings, and professional meetings or conferences.

### Group Training

These workshops are designed to increase knowledge, skills, and competencies regarding AT. They may target a category of equipment or target an individual device and may relate to specific disabilities or environments. This is a fee-based service.

## Technical Assistance

Our AT Tryout Center staff engage in specific AT related problem-solving activities to help programs and agencies improve services, management, policies, and/or outcomes. This is a fee-based service.

## Who We Serve

We offer services to all Vermonters regardless of age, ability, or socioeconomic status. There are no eligibility requirements.

“I want to thank you, thank you, thank you, and I could go on and on and on. I don't remember how I became aware of you and your program, however, when I met you, it was my lucky day!” – L.D., Orleans County

## About Us

The mission of the Vermont Assistive Technology Program is to support full access and integration for Vermonters with disabilities and aging-related needs, in education, work, and in their communities. We do this through a partnership with the University of Vermont's Center on Disability and Community Inclusion and the State of Vermont's Department of Disabilities, Aging, and Independent Living. Funding is provided by the U.S. Department of Health & Human Services.
